

TOWN OF Brownsburg

Official Town Newsletter for the Residents of Brownsburg Fall 2015

FROM THE TOWN MANAGER'S OFFICE

The topic of livability, and more specifically walkability, comes up in most conversations about what makes a community a great place to live. Brownsburg has grown by nearly 50 percent in the past 20 years. We know the suburb is attractive to new residents for its proximity to the city, its small town character, great schools and safe neighborhoods. But we also know that we have to develop new and improved amenities to serve and retain residents.

A vital part of that effort is the Active Transportation System for bicycle and pedestrian travel. The Town and Brownsburg Parks conducted a community survey in 2014 in which more than 80 percent of respondents said creating additional bicycling and pedestrian facilities was of high importance. More than 90 percent would bike and walk more if facilities were closer to their homes.

The Town's Comprehensive Plan calls for optimizing the local transportation system to not only alleviate traffic congestion by offering an alternative means to access commercial nodes, but to better connect neighborhoods and destinations and provide a safer walking and biking environment. Development of more trails and greenways also increases recreational opportunities and will improve the quality of life and health of residents.

The Town has several trail projects underway or planned for the near future. The new 4.3-mile trail on East and West Northfield Drive connects US 136 from east to west and links up Creekside Commons, Northridge, Austin Meadows and Summer Ridge. Residents from those neighborhoods can safely access the commercial nodes at Northfield Drive and N. Green Street as well as at E. US 136 and E. Northfield Drive.

The gateway landscaping project at the N. Green Street/I-74 Interchange will establish a trailhead for a new path planned to go north under I-74 and provide access to the neighborhoods including Whittington Estates, Green Street Village and Brownsburg Point Apartments. This gateway will also offer a connection to the future White Lick Creek Greenway that will connect to Arbuckle Acres Park and Williams Park. The ultimate goal of the Greenway is to connect to the B & O Trail and then on to the Town of Avon.

To see the entire Active Transportation Plan, visit the website www.brownsburgparks.com. Download the publication under the "Useful Links" tab.

BROWNSBURG EXPLORES SPECIAL CENSUS

Brownsburg Town Council agreed at its July 9 meeting to request a cost estimate from the Census Bureau for a Special Census in FY2016.

With a marked increase in single family and multi-unit residential housing as well as the Brownsburg East, Ward and Northfield at Wynne Farms annexations, Brownsburg has experienced significant growth since the 2010 Decennial Census certified the population at 21,285 residents. Town officials believe that the current population is between 24,000 and 25,000 and expect that number to grow beyond 25,000 residents during 2016.

Because the State of Indiana disburses several categories of tax revenue on a per capita basis, including Motor Vehicle Highway funds, the Town could capture nearly \$170,000 in additional revenue each year if the population is certified as 25,000 or more.

CAPITAL PROJECTS UPDATE

Ronald Reagan Parkway

– Construction of the 1.7-mile section of Ronald Reagan Parkway from CR 300N to US 136 is expected to begin this fall. Construction costs total just more than \$20.2 million, half of which is funded by the Urban Surface Transportation Program. The Town of Brownsburg will contribute \$7.4 million and Hendricks County will fund \$2.7 million of the costs to complete construction of the last leg of the county's major north-south connector.

Northfield East and West – The project to add new travel and turn lanes, intersection improvements, widening and completing the sidewalk, plus resurfacing existing travel lanes is nearing completion.

Gateway Landscape Project – New landscaping, a trail and shelter house are being installed at the I-74 gateway to promote trail/pedestrian traffic. It's expected to be complete in October.

Airport Road Lift Station – Construction is underway on the Airport Road Lift Station upgrade. The project will increase the pumping capacity for wastewater and improve the collection system for future development in that area. The \$435,000 project is being partially funded by the developer of Lacabreah Apartments.

Southside (Tilden) Drainage – This \$5.6 million project will separate the combined sanitary and storm sewer along Tilden from White Lick Creek to Jefferson will relieve demands on the sanitary system during wet weather events. Construction of the storm main line requires street replacement along Tilden including curbs and gutters, curb inlets and manholes. Construction completion will be dependent upon weather and other factors.

Tilden Road will be closed to through traffic from Green Street west to Maxine Manor. The official detour is Maxine Manor/W. Williams Drive. Motorists traveling from the west may also use CR 600 to US 136. And from the east, motorists may also use US 136 to CR 600 or CR 350N to CR 575E.

RESIDENT ACADEMY GIVES INSIGHT INTO MUNICIPAL OPERATIONS

The Town of Brownsburg is offering a new Resident Academy for those who are interested in learning more about how their local government operate. A mix of instruction and hands-on interaction, the six-session program is designed to help residents better understand municipal operations and how services are delivered.

The first class of 38 Resident Academy participants meets in various Town facilities for tours and an up-close view of day-to-day responsibilities and operations. Through the sessions with town departments, participants will learn about the budget process and its limitations and how their tax dollars are used to deliver municipal services and programs -- from administration and parks to public works and public safety.

Sessions will cover specific topics such as boards and commissions, the budget process, the zoning and planning process, parks programs and future developments, and neighborhood watch. The classes will get tours of Town Hall, the Wasterwater Treatment Plant, and the Water Plant at Arbuckle Acres.

PRAISE FOR BROWNSBURG QUALITY OF LIFE CONTINUES TO ROLL IN

It's easy for those of us who live in Brownsburg to talk about the community's great quality of life. But when national organizations take note of the great schools, employment opportunities, affordability, and safe neighborhoods, that's really saying something.

Last year, consumer advocacy website Nerdwallet ranked the community fifth in Indiana for homeownership and fourth among the state's best places for young families. The Movoto real estate blog ranked Brownsburg eighth among the state's safest places to live.

Accolades continued to roll in this year. ValuePenguin consumer website ranks Brownsburg in the top 10 safest places to live in Indiana. The town listed at number 7 among those with a population greater than 20,000. ValuePenguin collects FBI crime statistics and creates an aggregate crime score taking into consideration the rates of violent crimes and property crimes as well as population.

Brownsburg also made The Safewise Report's list of safest Indiana cities. The home security and safety advice website also analyzes FBI crime data, comparing the number of violent and property crimes. At 19th on the list, Brownsburg's overall crime is 40 percent less than the national average and violent crime is 60 percent less, according to Safewise.

And, HomeSnacks infotainment site recognizes our quality of life, calling our hometown the fifth best place to live in the Hoosier state, based on criteria including unemployment rate, home prices, incomes and crime data.

TOWN PREPARES 2016 BUDGET

The process to approve the next annual Town budget starts not long after the previous year's budget is adopted. The budget process involves careful review between the Town Manager's Office and all department heads, holding a special Town Council budget meeting for Council input, then adopting the budget over the course of a public hearing and three readings by the Town Council. The hearing and all Council meetings are noticed and open to the public. The adopted budgets are then filed electronically with Indiana's Department of Local Government Finance.

With several weeks to go until adoption, the proposed 2016 budget totals about \$50.9M across over 25 funds. The primary funds are the General, Water, Wastewater, and Stormwater Funds, which combine for almost \$23M, or about 45% of all budgeted funds. Some of the other funds include the Motor Vehicle Highway, Park & Recreation, Economic Redevelopment, and Food & Beverage Funds.

Increases in some of the fund's budgets address infrastructure projects that are programmed for the coming fiscal year and are a reflection of the continued growth Brownsburg experiences. With a combination of responsible commercial and residential growth, the generation of the funds to provide the necessary services can be spread out over a broader base. The below graph reveals the inverse relationship between the growing assessed value of the Town and the corporate property tax rate.

Relationship between Assessed Value and Tax Rate Since 2012

The proposed 2016 General Fund budget is a balanced budget. Planned expenses are generally less than projected revenues, particularly for recurring operational expenses. For some funds, healthy fund balances allow expenditures to exceed revenues in a given year when approved. In this way, the Town can save for several years for a specific purpose or project.

In all cases, the Town continues to strive to find new ways to save and maximize tax payer dollars while continuing to provide quality service and achieve progress in our many areas of focus. For example, over the past few fiscal years, the Town has sought and received over \$31M in federal funds to supplement local funds for numerous infrastructure projects such as the Ronald Reagan Parkway extension, Northfield Drive widening, several upcoming

trail projects, and planned widening of Green Street from Main to 56th Street.

The portion of the budget derived by property tax revenue includes the General Fund, Motor Vehicle Highway (MVH) Fund, Building Debt Fund, and the Cumulative Capital Development (CCD) Fund.

Approximately 22% of the annual property tax paid by a homeowner goes to the Town of Brownsburg to fund these four operating funds. Another 11% of the total tax paid goes to the Fire Territory. The remaining two-thirds is a revenue stream for other agencies such as the county, township, library, and school district.

Property taxes do not fund water or wastewater utilities, these utilities are funded by user fees and charges. The below graphic depicts the FY2015 destination of property taxes paid.

2014 pay 2015

- \$0.5307 Brownsburg School Corp.
- \$0.2115 Town of Brownsburg (including Police Department)
- \$0.1139 Brownsburg Fire Territory
- \$0.1095 Hendricks County
- \$0.0236 Brownsburg Public Library
- \$0.0008 Township

Once the 2016 budget is adopted, copies will be available on the Town's website, brownsburg.org, with hard copies available for inspection in the Town Manager's Office and in the Clerk Treasurer's Office. Staff are happy to answer questions about the budget anytime.

PUMPKIN SMASH BASH AND 5-0/5K RETURN TO TOWN HALL

Brownsburg's popular Pumpkin Smash Bash returns to the Town Hall Green on Saturday, October 3. In its third year, the fall carnival hosted by the Town of Brownsburg, Brownsburg Parks and the Brownsburg Police Reserve Division will start with a 5K and continue with fun seasonal activities throughout the day.

The Pumpkin Smash Bash runs from 11 a.m. to 3 p.m. with free kids' activities including a bounce house, face painting, an obstacle course, putt-putt golf, and a Halloween-themed photo booth. Hayrides through Arbuckle Acres Park will be offered for \$3 per person or \$15 for a family up to 6 members. A pumpkin patch in the park will have pumpkins available for purchase.

Attendees may register in advance for the costume contest and pumpkin decorating. There is a \$5 fee for the decorating contest, which includes the pumpkin and decorating supplies. The costume contest is open to everyone, with judging categories for ages 6 and under; 7 to 13; and 14 or older. There is also a prize for the best pet costume!

Start the day early with the 5-0/5K Foot Pursuit organized by the Brownsburg Police Department Reserve Division. Several of Brownsburg's finest will be running in full uniform and others will be walking with families who come out for the event, which begins at 9:30 a.m. at the Police Department. Registration is \$30 for adults; \$20 for students 11 to 18; and free for kids 10 and younger. For more details, like [Facebook.com/BPD505K?fref=ts](https://www.facebook.com/BPD505K?fref=ts).

Proceeds from the Pumpkin Smash Bash go toward scholarships for the Before and After School Enrichment Program to families needing financial assistance to participate in B.A.S.E. Proceeds from the 5-0/5K Foot Pursuit support BPD community outreach including the Back to School Backpack Attack, food and lodging vouchers for families in need, bike helmet reward coupons, and more.

For more details about the Pumpkin Smash Bash and links to online registration for the costume contest, pumpkin decorating, and 5-0/5K Foot Pursuit visit www.brownsburg.org.

BENHAM FILLS COUNCIL SEAT

Sean Benham was elected in a precinct caucus on September 12 to fill the Brownsburg Town Council Ward 5 seat.

A resident of Brownsburg since 1999, he has previously served on the Town's Redevelopment Commission, Economic Development Commission, Brownsburg Improvement Committee, and the Comprehensive Plan steering committee. He currently serves as a deacon and junior church superintendent for his church.

TOWN ADMINISTRATORS SPEND FRIDAYS IN THE FIELD

Think your boss could do your job? At the Town of Brownsburg, employees get to find out. Fridays in the Field is a program that takes Town Manager Grant Kleinhenz and Assistant Town Manager Brian Hartsell out of the office and into Town departments to perform daily tasks.

The goal of the program is to improve relationships between administration and staff. And, by rolling up their sleeves to experience Town laborers' working conditions, they get a better idea of what departments need when it comes to budget time.

Recently, Hartsell rode along with mosquito control crew members to learn first-hand what goes into controlling the mosquito population during the warmer months.

Kleinhenz got his hands dirty with wastewater staff, cleaning the peripheral feed holes at one of the treatment plant clarifiers -- a simple maintenance element associated with the complex treatment process that ensures the Town's wastewater is cleansed before returning back to nature. He also helped the water department take apart and repair a fire hydrant that was hit by a truck.

Fridays in the Field gives employees a chance to see the administration in a different light. And, it helps the administration appreciate what it takes for employees to perform their important roles in maintaining and improving our Town.

BROWNSBURG EXPLORES SPECIAL CENSUS Continued from page 1

Based on the estimated population difference, the Town of Brownsburg could miss out on additional revenue of nearly \$680,000 if it waits until the 2020 Decennial Census.

A special census for a community our size could cost \$200,000 to \$300,000. The Town could gain \$168,000 additional revenue annually if the population is 25,000 residents, recapturing the cost and gaining the additional revenue in less than two years.

BROWNSBURG PARKS CONTINUES ARBOR MANAGEMENT EFFORTS

Brownsburg Parks is currently assessing all trees in the parks and along trails. This assessment is to determine the impact of the Emerald Ash Borer.

The Emerald Ash Borer, a beetle once native to Asia, was found in northern Indiana a few years ago. The adult beetles feed on Ash tree foliage, but don't cause much damage. The larvae; however, feed on the inner bark of the Ash trees making it unable to transport water and nutrients, causing the tree to die. In an effort to help our environment, Brownsburg Parks is assessing trees that already have damage and will be prioritizing them for removal.

Brownsburg Parks is taking measures to plant new trees and help our community stay healthy with a sizable tree canopy for improved air quality. Our Arborist on staff is prioritizing the removal of these trees based on location, safety of surrounding areas and other maintenance needs. In order to reduce waste, some of these trees with little to no decay could be claimed for educational material in parks, construction of future outdoor classrooms, or repurposed for "nature playgrounds."

As a way to grow the tree canopy in our community, Brownsburg Parks is having a fall tree sale. Trees for sale include: Tulip Poplar, Red Maple, White Oak, White Pine, River Birch, and Black Cherry. Buyers of the tree sale have the opportunity to purchase trees to donate to Brownsburg Parks. The donated trees will be planted in a predetermined parks location by the grounds staff.

For more details on how Brownsburg Parks, along with the Town of Brownsburg, are working to care for the trees of the community, view the "Urban Forestry Management Plan" or order trees through September 20 at www.brownsburgparks.com.

COUNTY PLANNING FOR STATE'S BICENTENNIAL CELEBRATION

Planning for a massive, year-long celebration to commemorate Indiana's Bicentennial or 200th anniversary as a state has begun, and help is needed at the local level to plan activities in Hendricks County in 2016.

Local residents, business and civic leaders interested in learning about volunteer opportunities are encouraged to attend a Bicentennial celebration kickoff at 6 p.m., Sept. 29 at Visit Hendricks County, 8 W. Main St. in Danville.

The meeting will include details of state and local plans for 2016 and ways locals can become involved in planning and/or overseeing this project in Hendricks County. For more information about this meeting, e-mail Josh@VisitHendricksCounty.com or call 317-718-8750. For more information about the state's plans, visit the state's Bicentennial website at www.Indiana2016.org.

Fall Tree Sale

Trees can be purchased at a reduced price on our website or at the Brownsburg Parks office.

Last day to purchase trees is on Friday, September 20.

Tree delivery for Hendricks County Residents October 5-9.

Tulip Poplar	White Pine
Red Maple	River Birch
White Oak	Black Cherry

COMBINED SEWER OVERFLOW PUBLIC NOTICE

The Town of Brownsburg, as part of the combined sewer overflow (CSO) notification program, hereby states that the potential for a combined sewer overflow into White Lick Creek during, and immediately following, any rain event or snow melt exists throughout the year. People who swim, wade in, or ingest the water contained in White Lick Creek at any time may become ill.

Wastewater discharges are disinfected during the months of April through October. All individuals should remain clear of White Lick Creek during the winter months regardless of the weather. The overflow discharges are located downstream of Arbuckle Acres, but upstream of Williams Park.

Individuals with property along White Lick Creek between Brownsburg and Plainfield may request a warning sign be posted along the creek bank of their property. For additional information or warning signs call (317) 852-1114.

Combined Sewer Overflows			
Month	2014 Events	2015 Events	2015 Total Gallons per month
January	0	0	0
February	1	0	0
March	0	0	0
April	2	1	11,000,000
May	1	0	0
June	0	2	470,000

Brownsburg is continuing to minimize the number and volume of these events by maximizing flows to the treatment plant and moving forward with stormwater separation projects. During this past May, IDEM (Indiana Department of Environmental Management) and the Town of Brownsburg entered into an agreed order to develop a compliance plan to further minimize the number and volume of combined sewer overflows.

Activities that have been included in the plan for improvement are: the separation of 55 acres of combined sewer area that is currently under construction along Tilden Avenue; sewer lining/repairs of 6,000' over the next four years; separation of five acres of combined sewer area along Green Street between Main and 56th Street; and the cleaning/televising of 200,000 feet of sewers through 2019.

Residents throughout the community can help reduce stormwater flows into the sanitary system by making sure that their sump pump lines and gutters (if connected into the existing combined sewer) are connected to the new storm lines. Residents are also encouraged to use methods such as rain barrels to benefit from "free" water.

TOWN WORKS TO PROTECT DRINKING WATER

The source of Brownsburg's drinking water is groundwater from local drinking water wells. To help protect the underground aquifer and water wells from potential contamination, the Town of Brownsburg has a Wellhead Protection Plan which was approved by the Indiana Department of Environmental Management (IDEM) in November 2002.

Since then, the Local Planning Team has met annually to update the Plan and implement management strategies to protect our drinking water source. The Town of Brownsburg continues to implement strategies to protect groundwater and stay in compliance with IDEM requirements.

A complete copy of the Wellhead Protection Plan and educational pamphlets are available for public viewing at the Development Services Department in Brownsburg Town Hall at 61 N. Green Street.

The Local Planning Team held an annual meeting on June 25, 2015 to discuss the Wellhead Protection Program. Brownsburg's Wellhead Protection Program focuses on public awareness, education, spill prevention and reporting.

This year, notification letters with educational materials regarding Wellhead Protection will be sent to potential contamination sources located within the Town's Wellhead Protection Areas.

In the upcoming year, the Local Planning Team will continue public education efforts and will also focus on identifying active, inactive, and abandoned water wells.

Water wells that become damaged, or are no longer in use, may become a potential conduit for surface contamination to reach the groundwater and contaminate the underground drinking water source.

If you have a well on your property, please contact Mike Good, Water Superintendent, Brownsburg Municipal Water Utility, at (317) 852-1138.

ILLEGAL YARD WASTE DUMPING CAUSES STORMWATER POLLUTION

You may not realize that yard debris like grass clippings, leaves and shrubbery trimmings are a significant source of stormwater pollution. Yard waste carries fertilizers and pesticides into our waterways, causing nutrient pollution and depleting oxygen that aquatic life need to survive. Leaves and grass clippings can clog culverts, storm drains and pipes, causing flooding.

Proper yard waste disposal is more than just a good idea, it's the law. Brownsburg Municipal Code prohibits dumping or discharging into the storm drain and makes it illegal for anyone to put organic waste into the sidewalks and streets. When the Town of Brownsburg finds that a person has violated the code, it will issue a notice ordering compliance and the violation could result in a fine. Call the confidential Stormwater Hotline at 852-1121 or use the website Action Center to report a polluter.

What can you do?

- Don't blow grass or pile leaves on the sidewalk or in the street where they can blow or wash into the storm drains. Aim your mower away from paved areas. Use a leaf blower or broom to move clippings into the yard, NOT into the street.
- Don't dump grass clippings or other yard waste in a swale, ditch or creek. Recycle grass clippings as a natural fertilizer. Leave them on the lawn to biodegrade or compost it for a rich natural fertilizer for your plants and garden.
- Bag your leaves for the Town of Brownsburg's free curbside pickup service in the fall.
- Properly dispose of yard waste at the Hendricks County Solid Waste Management District's recycling center. Or, check with your trash service to see if they collect bagged yard waste with your weekly trash pick-up.

LEAF PICK-UP STARTS SOON

The Street Department starts free curbside leaf pick-up in early October. Leaves in recyclable, paper bags can be put out behind the curb for weekly pick-up. Make sure the bag is closed securely and is light enough for one person to lift. Do not put sticks, limbs, shrubs, dirt, trash, or other items in the leaf bags, please.

Due to the increase in size of the service area, the route runs Monday through Wednesday every other week instead of weekly as it has been in previous years. Thursday and Friday are make-up days in the case that weather or other factors delay the regular schedule. When a holiday falls on Monday, the route will begin on Tuesday.

Want to know what day the Street Department comes to your neighborhood? View the Route 1 and Route 2 schedules on www.brownsburg.org under Town Departments/Street Department/Limb and Leaf Pickup.

SEWER CREDIT AVAILABLE

Town Council recently passed an ordinance to clarify the Town's long-standing policy of allowing sewer bill credits in certain situations.

The code allows the Utility Billing Office to apply a one-time sewer credit each year to account for quantities of water that may have been consumed, but may not have entered into the sewage system. For many customers, this may be due to filling a pool or watering the lawn, for instance.

Utility customers on Town water and sewer may apply for the one-time credit by December 1 of each year by submitting the online form or a hard copy form at the utility billing office customer service counter Monday through Friday 8 am to 4 pm.

The credit will be based on the difference between the average monthly use subtracted from the requested usage month. The Utility Billing Office maintains a policy that details the credit process and the time period that generates the average monthly use for both established and newer customers. For questions about the credit, please contact the Utility Billing Office at (317) 852-1102.

TIPS FOR SNOW PLOW SEASON

Winter will be here before we know it! The Street Department would like you to keep some things in mind during the busy snow plow season.

Try not to park on the street, so plows can get as much snow cleared as possible.

Wait until the street is plowed before you clear your driveway. This avoids having the snow plowed back into the space you just cleared.

When you clear your drive, please do not pile the snow in the street. This may create an unsafe situation and the Town may have to return and push that same snow back into your driveway.

An excessive amount of snow requires the Town to plow streets more than once during the same snow event. Keep this in mind when you clear your drive before it stops snowing.

If a plow causes damage to the yard or mailbox at your residence or business, call (317) 852-1113 so we can repair it.
