

Town of Brownsburg

Video Recording Policy

The Town of Brownsburg is implementing this video recording policy to provide an environment for local residents and guests to participate in the town meetings and other functions without obstructions of video recording devices. The Town live streams its meetings and makes the recordings available to the public on its web page.

All video recording devices are to be placed behind the seating area at the rear of the Town Council chambers. Any recording device must be used in a fashion to leave a walking path either in front of or behind the last row of seats to allow patrons to move about the chamber.

Policy Effective Immediately
